

VersaCount™ XP

Features and Benefits

The VersaCount XP has earned a reputation as the leading multi-function counter on the market. Praised for its ease of use and functionality, the VersaCount offers fast installation and programming and an easy-to-read display featuring the largest numbers in the industry. The VersaCount XP series features PC-based programming. Program your production specs on a PC, then use a flash drive to download them to the VersaCount. The world's best counter is now even better.

Features:

Programming Assistant Software, a Veeder-Root first!

PC based

Free Software Download!

Easily upload of programs and setup parameters using USB port connection with PC and cable or flash drive

Quick Connect Wiring Terminal

Benefits:

- Create applications easily
 - Archive multiple applications for easy access and upload on multiple controllers or a replacement unit.
-
- You can print and review your settings prior to activating the program
-
- Mistakes Avoided! You can fully review your program BEFORE you upload it, avoiding expensive downtime from a programming error
 - Technical Support and trouble shooting is a breeze – just call Veeder-Root and send the program to their engineers via an email. They can evaluate the programming and offer guidance.
-
- No more standing at the panel, punching through menus, and hoping you got it right. Just plug in your USB drive or plug in your computer, and upload your program
 - Program multiple controllers with the same program with your USB drive stored program, eliminating input mistakes
-
- Install your counter in about 3 minutes, versus up to 17 minutes or more for other counters – puts you in production faster.
 - When a replacement is needed, costing you production, change out is quick and simple, getting you back in business faster than any other counter.
 - Ease of installation, with no special tools required.

VersaCount™ XP

Features and Benefits

Features:

Full multi-functional counter in compact 1/16 DIN size

Fast input frequency up to 60 kHz

**Prescaler accuracy to one 10,000th
Free Software Download!**

Prescaler adjusts from 0.0001 to 99.9999

**Three presets, one absolute or trail preset
and two relay outputs, up to 3 solid state
outputs**

**Signal /relay hold times selectable or
programmable from 0.001 seconds up to
10 minutes + latch**

**Large 2 Line, Easy to Read Display.
Largest display in its class 2nd line is
programmable to read any setup
parameter**

**Flexibility of Modes: Pulse counter,
Tachometer Timer, Shift counter, Batch
counter**

Benefits:

- All the Functions - Less Panel Space!
- Keeps up with YOUR High Speed Production Line. Ideal for your high speed counting or measuring applications.
- Dependable Accuracy! In the Units and Increments You Select!
- Precision in your units to match your counting or measuring needs
- Precise control for all your applications
- Need flexibility on output times? Get it! Adjustable to meet your requirements.
- Get quick feedback on operational parameters
- Monitor current counter reading, plus the value for the totalizing counter or active preset, at the same time.
- Flexibility of Modes allows for a wide variety of applications and functions to meet your production needs. Applications include Range Function, Length Measurement, Position Indication, Piece Counting, Flow Measurement, Shift, Batch, Pulse or Piece Counting
