

Rugged performance, streamlined appearance & unsurpassed reliability for tank level indication.

High visibility

Brightly colored flags are easy to read, even at great distance. The indicator is isolated from the measured media, meaning SureSites® can be used where sight glasses cannot.

Highly configurable small footprint

The Mini SureSite® features a diameter of only 1 – ¼” and multiple mounting configuration options for visual indication where space is tight.

Continuous transmitter option

Add a transmitter to monitor your SureSite® remotely in addition to local visual indication.

Electronics external to tank

Reduce number of tank penetrations for easier installation and serviceability.

Fit and forget design

With no glass to break or leak, SureSite® indicators are ready for years of service.

Are you ready to replace your cloudy, leak-prone, breakable sight glass with reliable indication?

MINI SURESITE®

Marine

Rail

HVAC/R

For use in many industries and applications, including: power generation, light industrial tanks & injection molding

Mini SureSite® Competitive Advantages

- ✓ **High visibility** – Brightly colored flags for viewing over 100 feet away
- ✓ **Highly configurable small footprint** – Adaptable to specific tank requirements where space may be limited
- ✓ **Continuous transmitter option** – Add a transmitter to monitor your SureSite® remotely
- ✓ **Electronics external to tank** – Reduced number of tank penetrations for ease of installation
- ✓ **Fit and forget design** – No glass to break or leak and low to no maintenance required

Mini SureSite® Options

- ✓ **Mounting Configurations:**
 - Top and bottom
 - Side and side
 - Top and side
 - Side and bottom
- ✓ **Indicator Options:**
 - Polycarbonate rated to 300° F
 - Aluminum rated to 400° F
- ✓ **Indicating Scales:**
 - Feet and inches
 - Inches only
 - Metric
 - Custom markings available upon request
- ✓ **Multiple Electrical Options:**
 - Continuous (4-20mA, 0-5VDC and 0-12VDC)
 - Discrete Switch Modules (SPST, SPDT and DPDT)
 - Explosion proof options available
